MASTER CLOUD INFRASTRUCTURE & DATA PROCESSING AGREEMENT

COMMERCIAL COVENANTS, INFORMATION SECURITY SCHEDULE AND TECHNICAL SPECIFICATIONS

This Master Cloud Infrastructure Agreement (the "Agreement") is entered into as of October 1, 2023 (the "Effective Date"), by and between Aegis Financial Technologies Inc., a Delaware corporation with its principal place of business at 100 Wall Street, New York, NY ("Customer" or "Governing Entity"), and CyberVault Storage Solutions Ltd., a global cloud hosting and storage provider ("Vendor" or "Service Provider").

RECITALS
WHEREAS, Customer operates regulated financial services technology infrastructure subject to GLBA, SOC 2, and GDPR standards;
WHEREAS, Vendor provides enterprise object storage, automated backup replication, and cryptographic key hosting services;
NOW, THEREFORE, in consideration of the mutual covenants contained herein, the parties agree as follows:

SECTION 1. DEFINITIONS & INTERPRETATION
1.1 "Customer Confidential Data" means all proprietary information, customer telemetry, financial records, and personal data.
1.2 "Security Incidents" means any confirmed breach of security leading to the accidental or unlawful destruction, loss, or alteration of data.
1.3 "Statutory Compliance Standard" means adherence to AICPA SOC 2 Type II criteria and ISO/IEC 27001 mandates.

SECTION 2. SCOPE OF SERVICES & DATA STORAGE
Vendor shall provide cloud storage infrastructure with 99.99% availability SLA. Customer retains sole proprietary ownership of all data objects.

SECTION 3. CRYPTOGRAPHIC DATA ENCRYPTION (RULE-SEC-001)
Vendor covenants and warrants that all Customer Data stored within Vendor's cloud storage clusters, databases, and persistent block volumes shall be encrypted at rest using Advanced Encryption Standard with 256-bit symmetric block cipher keys (AES-256-GCM). All data transmitted across external public networks or inter-datacenter communication channels shall be strictly encrypted in transit using Transport Layer Security protocol version 1.3 (TLS 1.3) with mandated Perfect Forward Secrecy (PFS).

SECTION 4. MULTI-FACTOR AUTHENTICATION & ACCESS CONTROL (RULE-SEC-002)
Vendor shall enforce mandatory hardware-backed Multi-Factor Authentication (MFA) utilizing FIDO2 / WebAuthn standard security keys (or time-based cryptographic one-time passwords as a secondary fallback) for all administrative accounts, root bastion hosts, and engineer consoles possessing logical access to production clusters containing Customer Data. Single-factor username/password access is strictly prohibited.

SECTION 5. INDEPENDENT AUDIT RIGHTS & SOC 2 ATTESTATION (RULE-SEC-012)
Vendor shall undergo an annual independent Service Organization Control (SOC 2) Type II examination conducted by an accredited third-party CPA auditing firm in accordance with AICPA AT-C section 205. The examination shall cover the Trust Services Criteria of Security (CC6.1-CC6.8), Availability, and Confidentiality. Vendor shall deliver the full unqualified audit report to Customer within thirty (30) days of completion.

SECTION 6. INCIDENT NOTIFICATION CEILING (RULE-SEC-004 & GDPR ART. 33)
In the event of a confirmed or reasonably suspected Security Incident or unauthorized disclosure affecting Customer Data, Vendor shall provide written notification to Customer's designated CISO without undue delay and in any event within seventy-two (72) consecutive hours of initial operational detection. Such notice shall detail the nature of the breach, affected records, and remedial mitigation actions.

SECTION 7. SUBPROCESSOR GOVERNANCE (RULE-SEC-006 & GDPR ART. 28)
Vendor shall maintain an active registry of all downstream infrastructure subprocessors. Vendor covenants that all subprocessors shall be subjected to rigorous security vetting and shall execute data protection agreements imposing security obligations no less restrictive than this Agreement.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement as of the Effective Date.
